Summary:

Computer Science student with knowledge of cloud computing and experience as a former Tech & Design Intern at SnapWeaz. Skilled in frontend and backend development, UI/UX design, and modern web technologies. Passionate about combining design and engineering to build impactful digital solutions and deliver meaningful user experiences.

Education:

DY Patil International University, Akurdi, Pune

B.Tech in Computer Science and Engineering

- 2023 – 2027

Experience:

SnapWeaz - Tech & Design Intern

- May 2025 – July 2025

- Designed and developed responsive frontend interfaces using HTML, CSS, and JavaScript, ensuring smooth user experiences across devices. Created and deployed the entire official SnapWeaz website, handling end-to-end design, development, and launch.
- Contributed to backend development with PHP and MySQL, managing database operations, and developing an employee management database.
- Collaborated on overall UI/UX design, creating banners, ads, and visual assets for web and social media.
- Supported indexing and basic SEO improvements to optimize website visibility.

Skills:

- **Frontend:** HTML, CSS, Web Development, UI/UX and Design
- **Backend:** Software Development (PHP, Node.js, Express.js, MongoDB, MySQL)
- **Cloud & DevOps:** Cloud Computing (AWS basics), Website Hosting & Deployment, Cloud Operations Management
- **Other:** Leadership, Business Strategy, Content Marketing, Entrepreneurship
- **Languages:** English (Fluent), Hindi (Native)

Projects:

I. Road Vision

Developed an ESP32-CAM-based license plate recognition system for real-time vehicle detection and monitoring.

II. Virtual Lost & Found

Created a DBMS-powered web system to track and recover lost items at DYPIU, integrating a MySQL database for secure storage and retrieval.

III. Image to Text Converter

Built an OCR tool using Python and Tesseract to extract text from images with enhanced accuracy through noise reduction and thresholding techniques.

IV. Employee Management Portal

Designed a dynamic web portal with frontend and backend functionality using PHP and MySQL to manage employee records and automate HR tasks.
