Summary

Cloud Computing specialization student pursuing B.Tech CSE with hands-on experience in AWS, DevOps, CI/CD, deployment, DNS, SSL, and full-stack web development. Skilled in independently designing, deploying, and managing production websites with CMS and admin panel integration using AWS, Terraform, Docker, Linux, Netlify, and modern web technologies.

Education

DY Patil International University, Akurdi, Pune

2023 – 2027

B.Tech in Computer Science and Engineering – Cloud Computing Specialization

Experience

SnapWeaz – Tech & Design Intern

May 2025 – November 2025

- Independently designed, developed, and deployed the official SnapWeaz website with **15+ pages**, handling UI design, frontend development, hosting, SSL setup, SEO, indexing, and launch.
- Managed website deployment, domain configuration, DNS setup, SSL integration, and production hosting using **Netlify**.
- Integrated backend content management using **Netlify Decap CMS** and **Netlify Identity**, enabling admin panel-based website updates.
- Built responsive frontend interfaces using **HTML, CSS, and JavaScript**, while creating UI/UX layouts, banners, ads, and visual assets for web and social media.

Skills

Cloud & DevOps: AWS, EC2, S3, IAM, VPC, Route 53, CloudFront, RDS, Lambda, CloudWatch, Terraform, Docker, Linux, Git, GitHub, CI/CD, Netlify, DNS, SSL

Web Development: HTML, CSS, JavaScript, PHP, MySQL, Node.js, Express.js, MongoDB

Deployment & CMS: Netlify Decap CMS, Netlify Identity, Website Hosting, Domain Management, Deployment Automation

Design & UI: UI/UX Design, Figma, Web Design, Responsive Design, Banner Design

SEO & Content: SEO, Website Indexing, Content Management

Projects

SnapWeaz Website & CMS – *Netlify, Decap CMS, Netlify Identity, DNS, SSL, SEO, Terraform*

- Designed and developed the official SnapWeaz website with **15+ pages**, handling UI/UX, frontend development, deployment, indexing, and CMS-based content management.
- Worked on hosting setup, domain configuration, SSL integration, and deployment workflow to support a production-ready website.

Vicarage Nurseries Website & Blog CMS – *Web Development, Blog CMS, Responsive Design*

- Developed a professional website with blog CMS functionality for Vicarage Nurseries, a UK-based strawberry exporter.
- Built responsive pages and a content management workflow for easy blog and website updates.

Virtual Lost & Found – *React, Node.js, MongoDB, Cloud Storage*

- Built a digital platform to help users report, search, and recover lost items through a community-driven system.
- Added image recognition support to improve item identification and recovery workflow.

Road Vision ANPR System – *ESP32-CAM, Python, OpenCV, OCR*

- Developed an ESP32-CAM-based automatic number plate recognition system for real-time vehicle detection.
- Used computer vision and OCR workflow for number plate detection and recognition.

SnapWeaz Employee Portal – *PHP, MySQL, Authentication, Admin Dashboard*

- Created an internal employee management portal for SnapWeaz with database, authentication, and admin dashboard functionality.

Certifications

- **DevOps on AWS and Project Management** – Coursera, Apr 2026
- **AWS Cloud Practitioner Essentials** – Amazon Web Services, Jan 2026
- **Geodata Processing using Python and Machine Learning** – IIRS, ISRO, Mar 2025
- **Website Development** – Infosys, Mar 2024
