PROFESSIONAL SUMMARY

Computer Science Engineering undergraduate specializing in Cloud Computing with comprehensive hands-on expertise in DevOps, AWS infrastructure, CI/CD automation, cloud deployment, and full-stack web engineering. Proven track record of architecting and deploying production web platforms and automated pipelines leveraging AWS (EC2, S3, IAM, CloudFront, Route 53, RDS, Lambda), Terraform, Docker, Git/GitHub, Netlify, React, and Node.js. Passionate about scalable cloud architecture, infrastructure as code, systems reliability, and high-velocity software delivery.

TECHNICAL SKILLS & CORE COMPETENCIES

Cloud & DevOps	AWS (EC2, S3, IAM, VPC, Route 53, CloudFront, RDS, Lambda, CloudWatch), Terraform, Docker, Linux Administration, Git, GitHub, CI/CD Automation, Netlify, DNS, SSL/TLS
Web Development	HTML5, CSS3, JavaScript (ES6+), React, TypeScript, PHP, Node.js, Express.js, MySQL, MongoDB, REST APIs
Deployment & CMS	Netlify, Decap CMS, Netlify Identity, Production Website Hosting, Domain Management, Automated Deployment Pipelines
Design & SEO	Figma, UI/UX Design, Responsive Web Design, System Architecture, Banner Design, SEO Strategy, Search Console Indexing, Content Management Systems

PROFESSIONAL EXPERIENCE

Vicarage Nurseries — DevOps & Web Development Intern May 2026 – Present
Remote | Evesham, United Kingdom

- Designed, architected, and deployed the official production website for Vicarage Nurseries, delivering a high-performance, responsive web platform for a premier UK-based strawberry exporter.
- Engineered and managed production deployment pipelines, configuring DNS records, SSL/TLS certificates, cloud hosting infrastructure, Decap CMS workflows, and automated release triggers.
- Streamlined content management and catalog administration workflows, reducing content publishing latency and enhancing global web accessibility.

SnapWeaz — DevOps Intern May 2026 – Jul 2026
Pune, India

- Built and deployed a production client web platform while implementing end-to-end DevOps methodologies across the software delivery lifecycle.
- Constructed robust GitHub Actions CI/CD pipelines for automated build verification, testing, and deployment, reducing manual operational effort and release turnaround times.
- Standardized environment configurations and collaborated cross-functionally to enforce reliable versioning and deployment automation.

DesignFlu — Full-Stack Developer Aug 2025 – Feb 2026
Pune, India / Remote

- Designed, engineered, and maintained full-stack web applications utilizing modern frontend interfaces and scalable backend server architectures.
- Implemented reliable, performant, and secure API endpoints and database schemas across active development, testing, and maintenance cycles.

SnapWeaz — Tech and Design Intern May 2025 – Nov 2025
Pune, India

- Contributed to real-world technology delivery and digital design projects, collaborating closely with cross-functional engineering teams to produce scalable digital solutions.
- Led UI/UX wireframing, component design in Figma, and frontend implementation across core client requirements.

FEATURED ENGINEERING PROJECTS

SnapWeaz Website & Headless CMS

Netlify, Decap CMS, Netlify Identity, DNS, SSL, SEO, Terraform

- Designed and engineered the official SnapWeaz corporate website spanning 15+ interactive pages, handling full-stack development, UI/UX architecture, search indexing, and Decap CMS integration.
- Configured high-availability hosting, DNS records, SSL encryption, Netlify Identity authentication, and automated Terraform infrastructure workflows for a resilient production release.

Vicarage Nurseries Website & Blog CMS

React, TypeScript, Tailwind CSS, Framer Motion, Blog CMS

- Engineered a responsive corporate web application and customized blog CMS for Vicarage Nurseries, a UK strawberry exporter.
- Implemented a component-driven architecture with fluid animations and a structured content management workflow for streamlined editorial updates.

Virtual Lost & Found Community Platform

React, Node.js, Express.js, MongoDB, Cloud Storage

- Built a community-driven web platform for logging, cataloging, searching, and recovering lost personal belongings with real-time search queries.
- Integrated cloud storage and image-recognition workflows to improve item matching accuracy and accelerate property recovery.

Road Vision — Automatic Number Plate Recognition (ANPR)

ESP32-CAM, Python, OpenCV, OCR

- Developed an IoT edge computer-vision system utilizing ESP32-CAM microcontrollers for real-time vehicular surveillance and automated number plate recognition.
- Implemented computer vision pipelines, image pre-processing, and OCR algorithms for license plate localization and alphanumeric character extraction.

SnapWeaz Internal Employee Portal

PHP, MySQL, Session Auth, Admin Dashboard, RBAC

- Created a secure internal employee management portal featuring user authentication, relational database integration, and role-based access control.
- Designed a comprehensive administrative dashboard for employee directory management, record tracking, and operational task logging.

SnapSecure — Cloud Posture & Compliance Platform

React, TypeScript, AWS SDK, Node.js, Tailwind CSS

- Built an enterprise cloud security posture platform that interfaces with AWS APIs for continuous resource monitoring, policy verification, and security auditing.
- Automated AWS cost optimization analyses and security benchmark evaluations to detect misconfigurations and generate actionable remediation insights.

Snap2Sheet — Intelligent Document OCR Pipeline

Python, Tesseract OCR, OpenCV, Image Processing

- Developed an automated OCR text-extraction utility that converts image-based text and scanned tables into structured spreadsheet formats.
- Applied computer vision filters, contour detection, and noise-reduction techniques to optimize OCR character recognition accuracy.

Weaz AI — Intelligent Assistant Platform

React, TypeScript, LLM APIs, Node.js, Tailwind CSS

- Architected a multi-modal AI assistant platform combining conversational document intelligence, persistent memory, study toolkits, and research workflows.
- Built an intuitive modern user interface with streaming API responses, contextual session caching, and project task organization.

EDUCATION

D Y Patil International University, Akurdi, Pune

Aug 2023 – 2027

Bachelor of Technology (B.Tech) in Computer Science Engineering (Specialization: Cloud Computing)

Star International School, Gondia

Grade: 86%

Higher Secondary Certificate (HSC)

CERTIFICATIONS & PROFESSIONAL CREDENTIALS

- **DevOps on AWS and Project Management** — Coursera / AWS Training, 2026
- **AWS Cloud Practitioner Essentials** — Amazon Web Services (AWS), 2026
- **Geodata Processing using Python and Machine Learning** — IIRS, Indian Space Research Organisation (ISRO), 2025
- **Introduction to Generative AI**— Google Cloud, 2024
- **Building a MERN Application using Next.js** — Coursera, 2024
